PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience building and maintaining a regional web platform for 3M, used across multiple LATAM and European markets. Strong frontend background in React.js, JavaScript, HTML/CSS and Material UI, with hands-on backend work in Go and PHP (Symfony), SQL/MySQL query optimization and Docker. Currently pursuing a Higher Technical Degree in Systems Analysis while building independent projects with Python (FastAPI) and React Native. Available for remote roles from UTC-3, with strong overlap with US business hours.

PROFESSIONAL EXPERIENCE

Frontend Developer / Full Stack Web Developer
MKT Baires
Buenos Aires, Argentina (Hybrid) | Jan 2023 - Mar 2026

- Developed and enhanced frontend features for a regional web platform for 3M used across multiple LATAM and European markets, with React.js, JavaScript, HTML/CSS and Material UI.
- Implemented and integrated features on backend services built in Go and PHP (Symfony), extending the product beyond the frontend layer.
- Wrote and optimized SQL/MySQL queries for the data managed by the platform.
- Resolved production incidents autonomously through root-cause analysis and implementation of fixes, maintaining service continuity.
- Managed the development and deployment workflow with Docker, Git and GitLab, and adopted GitHub Copilot as a daily development aid, working with cross-functional teams under Scrum.

PROJECTS

Personal Finance App with Automation Engine
Python (FastAPI), React Native, SQLite, Google Workspace API | Mar 2026 - Present

- Built a mobile expense-tracking app in React Native with its own Python (FastAPI) backend and SQLite persistence.
- Built an automation engine on top of Google Workspace APIs that extracts structured data from credit card statement PDFs, consolidates the information and categorizes expenses, with secure access through a service account (JWT).

Audio Transcriber with Speaker Diarization
Python (FastAPI), Faster-Whisper, PyAnnote, OpenAI API, pytest | 2026 - Present

- Built a local-first application that converts audio to text and identifies which speaker said each segment, using speech-to-text models (Whisper, Faster-Whisper) and speaker diarization (PyAnnote).
- Designed a REST API in FastAPI with an asynchronous processing queue and DOCX/PDF export, covered by an automated test suite in pytest.

EDUCATION

Systems Analyst (Higher Technical Degree)
Instituto de Formación Técnica Superior (IFTS) | CABA, Argentina | Feb 2024 - Present

Computer Technician
Escuela Técnica N.º 7 D.E. 5.º "Dolores Lavalle de Lavalle" | CABA, Argentina | 2015 - 2020

CERTIFICATIONS

React JS - Coderhouse, 2022 | Front-End Development - Guayerd, 2021
Landing Page with HTML, CSS and JavaScript - Udemy, 2021 | AI for Everyone - AWS / TIDWIT, 2026

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), React Native, HTML5, CSS3, Material UI
Backend: Go (Golang), PHP, Symfony, Python, FastAPI, REST APIs, MVC architecture
Data and Cloud: MySQL, SQL, query optimization, AWS (S3), Docker, Git, GitHub, GitLab
Methodologies: Scrum, Trello, Jira, automated testing (pytest)

LANGUAGES

Spanish - Native | English - Intermediate (B1): technical reading and written communication
